Professional Experience

January 2023 – present

Bangalore, India

Aerchain, Software Developer [↗](#)

As an entry-level Software Development Engineer (SDE-I) specializing in frontend development at an innovative product-oriented company, my role is instrumental in creating outstanding user interfaces. I leverage a contemporary technology stack, which comprises HTML, CSS, JavaScript, ReactJS, Material-UI, and various other frontend libraries. My core duties revolve around conceptualizing, implementing, and upholding the frontend aspect of our product.

October 2022 – January 2023

Bangalore, India

Mountblue, Software Developer [↗](#)

In my capacity as a Software Engineer employed by MountBlue Technologies, I participated in an intensive training initiative centered on honing my front-end development expertise. This immersive training regimen furnished me with a well-rounded skill set encompassing HTML, CSS, JavaScript, and a variety of front-end technologies. This immersive experience primed me to tackle real-world web development challenges with confidence and proficiency.

May 2021 – November 2021

Vishakhapatnam, India

KwikBox, Frontend Intern [↗](#)

Collaborated with a development team to create and implement user interfaces using Angular, consistently meeting project deadlines. Assisted in troubleshooting and debugging issues, contributing to application stability. Gained proficiency in Angular and modern web development technologies while showcasing strong teamwork and adaptability skills.

Skills

- React
- HTML5
- Bootstrap
- Redux
- Redux ToolKit
- GitHub, GitLab
- JavaScript
- CSS
- Material UI
- Redux-Thunk
- SCSS

Projects

Medium Clone [↗](#)

- Created a replica of the Medium platform using React, with an emphasis on reproducing its core functionalities and UI. Leveraged HTML, CSS, JavaScript, and React to build a responsive and interactive reading and writing platform
- Utilized React for front-end development, React Router for seamless navigation. Ensured cross-browser compatibility and mobile responsiveness. Source Code [↗](#)

Trello Web Clone [↗](#)

- Successfully recreated the Trello project management platform using React, with a focus on replicating its core functionalities, including board creation, list management, and card organization.
- Utilized the Trello Developer API to integrate core features, allowing for seamless project, workflow, and task management.
- Demonstrated expertise in front-end web development, API integration. Source Code [↗](#)

Portfolio [↗](#)

- Designed and developed a responsive personal portfolio website, serving as an online showcase of my career, education, and work experience. The website offers smooth navigation, section redirection, and an engaging user experience.
- Utilized HTML, CSS, and JavaScript for web development, ensuring mobile responsiveness and cross-browser compatibility. Integrated smooth scrolling for easy section transitions and an interactive user interface

Food Much Website [↗](#)

- Developed a static, fully responsive landing page using HTML, CSS, and JavaScript.
- Improved user engagement with a visually appealing and interactive design.

Guessing game [↗](#)

- Created a JavaScript-based number-guessing game that engages users in a fun and interactive experience. Users input a number, and the game provides real-time feedback, indicating whether the guess is too low or too high, and congratulates them upon a correct guess.
- Developed the game using JavaScript for logic, HTML/CSS for the user interface. Implemented user-friendly input validation and random number generation for a seamless gaming experience.

Education

August 2018 – August 2022
Andhra Pradesh, India
