

## Dashboard

Sign in and registration			
1	cookie-based authentication	Laravel includes built-in authentication and session services which are typically accessed via the Auth and Session facades. These features provide cookie-based authentication for requests that are initiated from web browsers. They provide methods that allow you to verify a user's credentials and authenticate the user.	
2	Automatic dedication and log in	Based on above feature	
3	automatically login after registration	After registration user can access to dashboard and log in even if he doesn't verify the email, we will block features till verification done Not verified: no seller and buyer can show each other	
4	Terms and conditions agreement	"I agree to terms and conditions" after login and prevent user from accessing other routes.	Please discuss internally and suggest best practice
5	Applying OTP	Apply one time password through email and mobile number	
6	Applying password less login	This is pre defined codes already exists on web	
7	Laravel Socialite	Sign in with google\LinkedIn\...etc	
8	User activity records	log a user activity in Laravel	
9	Quick registration	Built in registration filed in homepage and product detail page , No password No verification after log in we ask for verification to unlock verified member features	Please discuss internally and suggest best practice
User Dashboard			
1	Recent search	In user dashboard left side menu add new tab for "search terms" maybe also for activity records Also all search terms done in website should have records in admin panel and result corrections (manually by admin)	
2	My Contact	Add new tab for supplier\buyer shortlist,	
3	Member ID	Add member ID and shall appear in admin and in user dashboard\profile	
4	Migration from another site	Add tab in left dashboard Migration from another site Auto & Manual ( give us your products links and we will upload your product)	Please discuss internally and suggest best practice
5	Trade Alert	Add tab for Trade Notification based on: <ul style="list-style-type: none"> <li>• keyword entered by user</li> <li>• recent search by user</li> <li>• new product,</li> <li>• new buyers</li> <li>• Sriram, work on this and suggest other.</li> </ul>	
6	Chat with your account manager	In dashboard main page and end of any section, design banner for live chat with power cozmo.	

7	Account preferences	<p>Add tab in dashboard for account preferences, and add below sub tabs</p> <ul style="list-style-type: none"> <li>• Subdomain setting (user can adjust-modify shop name \domain) which will appear in profile section enquiry center +chatting between users +browser link)</li> <li>• inquiry setting</li> <li>• Automate quote – Premium</li> <li>• Trade alert</li> <li>• suggest other</li> </ul>	
Add New product			
1	Supplying ability	In case of by order product add “ Supplying ability” filed How many unit can supplier sell in month\ day\year	
2	Delivery time	In case of order product what is the delivery time?	
3	Disapproved product	Under product tab in user dashboard add “ disapproved product tab”. This is menu for disapproved \expired product, we can disapprove product due to low quality post- none correct information.	
4	Default or pre-defined attribute	<p>Per category Pred Defined attributes</p> <p>In admin panel and in category configuration page we should integrate the followings fields:</p> <ol style="list-style-type: none"> <li>1.Pre-defined attributes terms and values -active passive, for each category -sub category</li> <li>2.Keywords. Manually and self-learning, category will be suggested when make category selection in add post</li> </ol>	
Profile – Personal section			
1	Preferred instant message ID	Skype We chat WhatsApp, etc	
2	Integrate Filed for	City, Country, Postal Code	
3	Job details	<ol style="list-style-type: none"> <li>1. Job Function (sales &amp; marketing, Engineering, procurement, operation. Management )</li> <li>2. Job Rule(Director, Owner, Executive, manager, other)</li> </ol>
